

SCOPE OF ACCREDITATION		
Material / product tested	Type of test, measured range	Test method
Building elements between rooms	Field measurements and rating of airborne sound insulation. <i>Frequency range of measurements: 50 Hz – 5 kHz</i>	ISO 140-4:1998 ISO/TR 140-13:1997 ISO 140-14:2004 ISO 717-1:1996
Façade elements and façades	Field measurements and rating of airborne sound insulation of façade elements and façades. <i>Frequency range of measurements: 50 Hz – 5 kHz</i>	ISO 140-5:1998 ISO/TR 140-13:1997 ISO 140-14:2004 ISO 717-1:1996
Floors	Field measurements and rating impact sound insulation. <i>Frequency range of measurements: 50 Hz – 5 kHz</i>	ISO 140-7:1998 ISO/TR 140-13:1997 ISO 140-14:2004 ISO 717-2:1996
Room spaces	Measurement of reverberation time <i>Frequency range of measurements: 50 Hz – 5 kHz</i>	ISO 354:2003
Environmental noise	Measurement of environmental noise. Industrial plant, road traffic, railway traffic, indoor noise, etc.	ISO 1996-1:2003 ISO 1996-2: 2007 YM:n ohje 1/1995
